Let's say, a roulette is a wheel with \$9\$ sections numbered from \$1\$ to \$9\$ and the section \$9\$ has \$6\$ ways. And we put money on section \$1\$. If the result is \$5\$ (a tail comes up), we put more money on the section \$1\$. And if the result is \$4\$ (a tail comes up), we put more money on section \$2\$ and so on. Thank you. A: Yes, this is very possible, but you need to be aware of the probabilistic behaviour. You don 82157476af
